EDUCATION

Ph.D. in Field of Study | University Name

Expected Month YYYY

M.A. in Field of Study | University Name

Sept YYYY–Oct YYYY

B.A. (Hons) in Field of Study | University Name

Sept YYYY–May YYYY

TECHNICAL SKILLS

- Tool A, Tool B (Library 1, Library 2, Library 3, Library 4), Tool C, Tool D, Tool E
- methodology area one (sub-method, sub-method, sub-method, sub-method), methodology area two (technique, technique, technique/technique)

SELECTED PROJECTS

Descriptive Title of First Project

[Report](#)

- One-line description of the data sources, scope, and assembly of the underlying panel or dataset.
- One-line description of the modeling approach and the kinds of analyses or scenarios it supports.
- One-line description of the causal/identification strategy and how the findings translate into actionable takeaways.

Descriptive Title of Second Project

[Github](#)

- One-line description of the models trained or compared and the scale of the task (e.g., number of series, records, or features).
- One-line description of deployment, productization, or downstream use that made the work reusable.

EXPERIENCE

Job Title

Month YYYY–Month YYYY

Employer Name

[Github](#)

- High-level accomplishment that names the tools used and the quality or reproducibility practices applied.
- High-level accomplishment showing the analyses produced, the scale of new data created, and the methods used to draw conclusions.
 - Sub-bullet describing one specific result, comparison, or improvement and what it enabled the team or stakeholders to do.
 - Sub-bullet describing another specific result, the technique behind it, and the decision or audience it supported.
- High-level accomplishment about metrics, dashboards, or repeatable reporting that you built or maintained.

Prior Job Title

Month YYYY–Month YYYY

Employer Name (context, e.g., through dissertation research)

- High-level accomplishment about reproducible pipelines or workflows you built using your core tooling for cleaning data, producing outputs, and analysis.
- High-level accomplishment about quasi-experimental or empirical analyses you designed, with a one-line statement of why they mattered, including:
 - sub-bullet naming a specific study, the outcome examined, and what it informed.
 - sub-bullet naming a second study, the mechanism it identified, and its practical implication.
- High-level accomplishment about structural or simulation modeling that turned estimates into forward-looking analyses, including:
 - sub-bullet describing one scenario or counterfactual and the question it answered.
 - sub-bullet describing another scenario or elasticity estimate and the broader behavior it helped explain.

Earlier Job Title (e.g., Research Assistant)

Month YYYY–Month YYYY

Employer Name, Location

- One-line accomplishment describing the project, the timeline, the techniques used (e.g., OCR, manual review, validation), and the deliverable produced.

SELECTED PUBLICATIONS

Last, First, Co-Author Name, and Co-Author Name. Forthcoming. [“Title of the Forthcoming Article.”](#) *Journal Name*.

Last, First, Co-Author Name, and Co-Author Name. YYYY. [“Title of the Published Chapter or Article.”](#) *Journal or Volume Name*.

Last, First. YYYY. [“Title of the Working Paper.”](#) Working paper.

—. YYYY. [“Title of an Earlier Working Paper.”](#) Working paper.

—. YYYY. [“Title of an Older Working Paper.”](#) Working paper.
